Aseer Ul Haq

Place of birth: Islamabad, Pakistan | **Phone:** (+92) 3035645357 (Mobile) | **Email address:** aseerulhaq178@gmail.com | **Address:** H.no 17 Nissan Motor Street Swan Camp Main Gt road, 46000, Islamabad , Pakistan (Home)

WORK EXPERIENCE

22/08/2025 - CURRENT - ISLAMABAD, PAKISTAN

ASSISTANT MANAGER GIS DEVELOPER NATIONAL DISASTER MANAGEMENT AUTHORITY (NDMA)

- Full stack Geospatial Development: Design and code high performance, interactive mapping interfaces and custom spatial dashboards utilizing Map box GL JS and Leaflet.

- Spatial Database Architecture: Engineer and maintain robust spatial relational databases using Postgre SQL and Post GIS, optimizing for high-volume spatial querying and data integrity.

- Geospatial Server Administration: Configure and scale Geo Server environments for the secure, efficient rendering, hosting, and dissemination of extensive spatial datasets via standard web services.

- Data Pipelines & Full-Stack Integration: Develop automated technical pipelines to process complex geospatial data, seamlessly integrating backend spatial infrastructure with dynamic frontends for real-time visualization and analysis.

18/07/2022 - 24/09/2022 - SASKATOON, CANADA

GIS INTERNEECHASR, UNIVERSITY OF SASKATCHEWAN

GIS analysis and mapping, utilization of web application builder using ArcGIS, making dashboards using independent and self managed information, observing and learning SDG's.

EDUCATION & TRAINING

16/09/2019 - 12/07/2023 - ISLAMABAD

BS SPACE SCIENCE - INSTITUTE OF SPACE TECHNOLOGY, ISLAMABAD

Website: http://ist.edu.pk/

12/07/2016 - 20/08/2018 - ISLAMABAD , PAKISTAN

INTERMEDIATE SCHOOL CERTIFICATE- FAUJI FOUNDATION COLLEGE FOR BOYS, NEW LALAZAR

01/05/2014 - 12/07/2016 - ISLAMABAD , PAKISTAN

SECONDARY SCHOOL CERTIFICATE- FAUJI FOUNDATION COLLEGE FOR BOYS, NEW LALAZAR

TEMPORAL ANALYSIS OF VEGETATION AND LAND SURFACE TEMPERATURE: A CASE STUDY ON DERA ISMAEL KHAN USING LANDSAT 8 DATA- INSTITUTE OF SPACE TECHNOLOGY

"DEVELOPMENT OF PUBLIC TRANSIT ROUTES USING GEOSPATIAL TECHNOLOGIES: A CASE STUDY OF THE TWIN CITIES" UTILIZING ARCGIS PRO FOR DIGITIZATION AND ANALYSIS, ARCGIS ONLINE FOR DASHBOARD, ARCMAP FOR MAPS, GPS APPLICATION FOR ROUTE TRACKING- INSTITUTE OF SPACE TECHNOLOGY, CHASR UNIVERSITY OF SASKATCHEWAN

GEOSPATIAL MAPPING OF SOLAR PHOTOVOLTAIC POTENTIAL AT BUILDING FOOTPRINTS LEVEL ACROSS NORTHERN RICH TOURISM DISTRICTS OF KPK, PAKISTAN UTILIZING ARCGIS PRO FOR SOLAR RADIATION CALCULATION ARCGIS ONLINE FOR DASHBOARD, ARCMAP FOR MAPS- INSTITUTE OF SPACE TECHNOLOGY, CHASR UNIVERSITY OF SASKATCHEWAN

ISLAMABAD, PAKISTAN

BURN SEVERITY MAPPING OVER MARGALLA HILLS NATIONAL PARK, 2021, UTILIZING GOOGLE EARTH ENGINE- INSTITUTE OF SPACE TECHNOLOGY

Address: Level-9, Serena Business Complex, G-5/1, Islamabad, Pakistan46000

ISLAMABAD, PAKISTAN

DEVELOPMENT OF INTERACTIVE DASHBOARD TO SHOW CENSUS DATA DISTRIBUTION IN PUNJAB USING ARCGIS- INSTITUTE OF SPACE TECHNOLOGY

Address: ISNET Secretariat SUPARCO Rear Headquarters, Suparco Road PO Box 8402, Karachi-75270, Pakistan75270

ISLAMABAD, PAKISTAN

DEVELOPMENT OF WEB MAP (LEAFLET) USING GEO SERVER TO MAP TIME SERIES LITERACY RATE IN EACH DISTRICT OF PUNJAB- INSTITUTE OF SPACE TECHNOLOGY

HAZARD ASSESSMENT OF SNOW AVALANCHE AND ITS RELATIONSHIP WITH EXTREME METEOROLOGICAL EVENTS- INSTITUTE OF SPACE TECHNOLOGY

URBAN HEAT MAPPING USING GEE, KARACHI 2015, ANALYZING THE MAGNITUDE AND HIGH IMPACT AREAS OF 2005 EARTHQUAKE IN PAKISTAN USING ARCMAP - INSTITUTE OF SPACE TECHNOLOGY

IMAGE PROCESSING ONRAMP ONLINE COURSE, MATLAB.- INSTITUTE OF SPACE TECHNOLOGY

USING ARCADE EXPRESSION IN ARCGIS DASHBOARD- ESRI

Website: https://www.esri.com/training/

INTRODUCTION TO ARCGIS ARCADE.- ESRI

Website: https://www.esri.com/training/

19/12/2025 - ISLAMABAD, PAKISTAN

TRAINING WORKSHOP - WWF

Implementation, Monitoring, Operations and Maintenance for Ecosystem-based Adaptation and Green Infrastructure Interventions under WWF-Pakistan's Recharge Pakistan Project

20/05/2026 - 21/05/2026 - ISLAMABAD, PAKISTAN

TRAINING WORKSHOP - UNESCO

Training workshop on Disaster Risk Reduction Knowledge Service and Digital CPEC

LANGUAGE SKILLS

Mother tongue(s): **PUNJABI** | **URDU**

	UNDERSTANDING	SPEAKING	WRITING

	Listening	Reading	Spoken production	Spoken interaction	
ENGLISH	C2	C2	C1	C1	C1

SKILLS

Technical Skills
deck.gl | Html, Java, CSS | MATLAB | MapLibre | R language and R Studio | Python | SQL | CI/CD pipelines management | PMTiles | Cloudflare | machine learning | AI automation | Python GIS Automation | Rest API | SvelteKit | GITHub | Node.js

Geospatial Tools and Frameworks
Leaflet / Mapbox-gl / OpenLayers / OSM / Google maps | PostgreSQL | Geopandas

Geospatial Software and Infrastructure
ArcPro / QGIS / ArcServer / Geoserver | Google Earth Engine (GEE) / Google Earth Pro | RAMMS | Erdas IMAGINE | ENVI | SNAP | Google Earth Engine | Proteus

Unlocking Solar Potential: Geospatial Mapping of Building-Level Photovoltaic Opportunities in Northern KhyberPakhtunkhwa's Tourism Districts, Pakistan 2025

This study evaluates the rooftop solar photovoltaic (PV) potential at the building level in the tourism-rich districts of Northern Khyber Pakhtunkhwa (KPK), Pakistan, using advanced geospatial analysis to support renewable energy planning. By combining the Area Solar Radiation tool with detailed building footprint data, the study identified solar energy potential and prioritized areas for PV system installations. Results show that approximately 35% of the 1.29 million buildings analyzed are suitable for solar panels, with energy generation capacity varying by building size and district. Spatial analysis further highlighted Union Councils (UCs) where over 50% of buildings are solar-suitable, enabling precise targeting of renewable energy initiatives. The study underscores the importance of integrating local geographical and socio-economic data to enhance the feasibility and scalability of solar energy solutions in rural and urban settings and can be used to guide policy prioritization and funding decisions. This research demonstrates how geospatial analysis and open data can drive localized clean energy adoption, directly contributing to Sustainable Development Goal 7 by advancing affordable and sustainable energy solutions.
